PALLETIZING INNOVATIONS

TAKE A LOAD OFF . . .

With a Load Transfer Station from Columbia Machine. The Load Transfer Station with Pallet Dispenser (LTS-PD) is made up of a standard LTS, pallet cart and pallet dispenser. The LTS speeds and simplifies receiving and shipping by making it easy for a single lift truck operator to transfer loads to alternate pallets such as Plastic, CHEP, GMA, slave boards, or slip sheets. Make your next load transfer an easy one with the LTS-PD.

LTS-PD

BENEFITS:

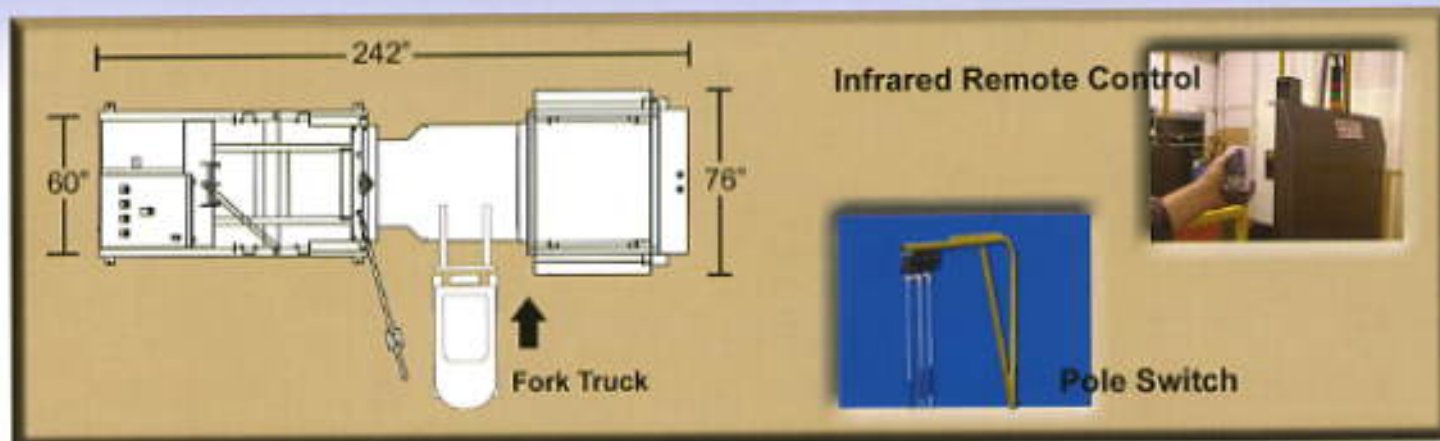

- Eliminate injury to warehouse personnel
- Streamline plant and warehouse operations
- Less wear and tear on lift trucks
- Improve plant and process cleanliness
- Reduce shipping costs
- Easy-to-operate (ETO)

To view a video of the LTS-PD in operation and for more information on Columbia Machine's complete line of Load Transfer Stations, please visit www.loadtransfer.net or call us at 1-800-628-4065.

Load Transfer Station with Pallet Dispenser

The LTS-PD is equipped with three pull cords. The first cord is a stop to shutdown the machine. The second cord is for auto-loading the pallet dispenser with a stack of empty "go to" pallets. The third cord activates the actual transferring of the loads. The pallet dispenser is self-loading and single random pallets can be transferred without cycling the pallet dispenser, greatly increasing the systems flexibility.

FEATURES:

- Cycles in less than 60 seconds
- Weighs approximately 10,000 lbs.
- Automatically dispenses "go to" pallets
- 5 HP integral hydraulic power unit
- Hydraulically actuated
- Extremely heavy-duty construction
- Overhead pivot pole controls
- Allen Bradley PLC
- Machine mounted guarding (where required)
- 4,000 lb. load capacity
- 5 Emergency stops
- Very low maintenance
- Automatically stacks up to 20 pallets
- Autoload pallet dispenser
- 230 or 460 VAC power supply
- 24 VDC controls
- UL rated control panel
- Easy to operate (ETO)

OPTIONS:

- Cold Climate Package - includes heaters for oil tank, control panel and UHMW
- Infrared remote control
- Adjustable back rest to "inset" loads
- Automatic adjustment for variations in pallet height
- Stainless steel paint
